

UPS Logistics Technologies

The One Solution For The Road You're On

The Mark of a Leader

Ready to take your operation to the next level? Then you're ready for the **Roadnet® Transportation Suite** from UPS Logistics Technologies. With this comprehensive set of fully integrated applications, your logistics staff can quickly take control over every aspect of your order-to-delivery process.

Concerned about off-the-shelf software that doesn't go the distance? Roadnet Transportation Suite is a proven, industry-leading solution that has been literally road-tested for strategic, tactical, and operational superiority. What's more, each of our products, whether deployed individually or as a suite for optimized results, is highly configurable in its design. In short, this solution adapts to the way you work, blending seamlessly with your current operations.

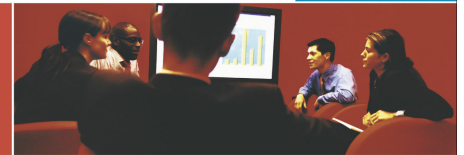

What do you stand to lose? Constant guesswork, inconsistent routing, lost drivers and missed deliveries. What you can gain is even greater:

- Decreased transportation costs
- Increased profitability
- Improved customer satisfaction
- Enhanced strategic planning capabilities
- Instant access to accurate delivery costs
- Optimized resource utilization and driver management

What about support? UPS Logistics Technologies provides your employees with specialized training through our **Roadnet University**, as well as dedicated customer service—24/7, 365 days a year. Our support helps your people to work at the top of their game, from first mile to last mile.

Like to get started with Roadnet Transportation Suite? Then let's take a look under the hood.

With Roadnet, There's No Limit.

When you're working to win, you work with a leader. For more than 20 years, UPS Logistics Technologies has delivered the industry's leading software solutions—solutions that help distribution and service companies just like yours realize greater results in service, efficiency and profitability than ever before. In fact, you'll find our products in daily use at more than 1,700 locations worldwide, optimizing delivery logistics and management of over 80,000 vehicles. Backed by the experience, strength and stability of UPS, one of the world's leading transportation companies, UPS Logistics Technologies is driven by a single goal—to make your business a success for whatever road you're on.

"By selecting solutions from UPS Logistics Technologies, we were able to get an entire transportation management package from one vendor. They offered a suite of solutions and made it easy to determine that it was the right solution for our organization."
