University Pediatric Specialists at Bel Air

Specialty Care with Children in Mind

Now the same top quality health care you've come to expect from the University of Maryland's Hospital for Children is close to home. Renowned pediatric experts with national reputations for excellence deliver specialty care at the new outpatient center designed with children in mind. The Harford County center is the first of several planned for the care of children throughout Maryland.

Responding to the growing needs of families — and their community physicians — University Pediatric Specialists offers evaluation and assessment, as well as follow-up care in a convenient location. For most children, care can be provided entirely at the Bel Air office — others will receive follow-up care after hospitalization.

Services are available in 16 specialties — including medical and surgical disciplines — and additional specialty services will be added over time. Laboratory services are also on site, and soon the center will be open five days a week.

Working in partnership with community physicians, this unique pediatric practice delivers care with a special blend of skill, experience and compassion, understanding that when it comes to a child's health nothing short of the best will do.

Services available at University Pediatric Specialists at Bel Air include:

- Behavioral Pediatrics
- Cardiology

In Partnership with Managed Care

To help make the services of University Pediatric Specialists accessible to more families, we have joined with many of the area's managed care providers. Here is a list of our current managed care partners. There are restrictions for some programs — contact your health insurance provider for more information, or call 1-800-373-4111 and a member of our staff will be happy to serve you.
